WasteMaid

Serving you and our environment

SERVING YOU...WasteMaid helps you with meal preparation because it makes cleaning up as you go so much easier and faster.

With the extra time on your hands you can tackle that special recipe or sneak in a little quiet time to relax!

...AND YOUR IMMEDIATE ENVIRONMENT

The space in and around the kitchen is usually the heart of a home. WasteMaid ensures no bad odours diminish the wonderful aroma of home cooked meals and removes waste from a bin virtually under your nose. In the process you reduce bacteria and eliminate a major cause of insect and rodent infestation.

SERVING OUR PRECIOUS ENVIRONMENT

As pressure mounts globally to reduce landfill and air emissions, WasteMaid offers an environmentally friendly way of waste disposal. The Chartered Institution of Water and Environmental Management (UK) investigated the environmental impact of Food Waste Disposers from studies conducted around the world. CIWEM (ciwem.org/policy/policies/food.asp) found: "Food waste disposers may have a useful place in the management of food waste... a more convenient and environmentally superior alternative to separate storage and collection..." WasteMaid avoids the odours, gasses

and pests that are often associated with compost bins. Less plastic bags, less landfill, more peace of mind.

SAFE AND SIMPLE TO USE

Just turn on a slow stream of cold water, switch on WasteMaid and scrape the food waste into the disposer. It even self-cleans, simply leave the water on for 25 seconds after all the waste has gone, then turn it all off. WasteMaid's unique Torque Master Grinding System grinds food waste into tiny particles without any blades or knives. WasteMaid can quietly dispose of virtually anything organic including; fruit and vegetable scraps, small bones, chicken and fish bones, eggshells,

WasteMaid® food waste disposers

corn cobs, nut shells, fruit pips, even tea leaves and coffee grounds.

WASTEMAID WIRELESS CONTROL SWITCH

Eliminate the need for a hard-wired wall switch and associated drilling through your sink or countertop. The convenient wireless control switch can be hidden from curious children – just plug it in and use.

EASY INSTALLATION

With a patented Speed Master mounting system, WasteMaid almost installs itself!

No glues or special tools are needed.

WasteMaid, is smaller and lighter than most other disposers, taking up minimal room in premium cupboard space.

Other state-of-the-art features that make WasteMaid the world's quiet achiever...

TORQUE MASTER GRINDING SYSTEM

Provides superior torque and grind speed with a precision balanced turntable and armature providing quieter operation, less vibration and longer system life.

PERMANENT MAGNETIC MOTORS

Powerful and energy efficient – producing maximum power

immediately, which helps avoid potential jams. The high-tech design gives the motors the intelligence to self-adjust power and torque depending on the load.

REMOVABLE SPLASHGUARDS

For easy cleaning and replacement.

CORROSION PROOF GRINDING COMPONENTS

All are backed by a lifetime warranty*.

BIO SHIELD

Unique antimicrobial agent permanently molded into components. An exclusive WasteMaid feature that eliminates bacteria-caused odours and inhibits the growth of a wide range of microorganisms.

* Excluding model 128.
