

Paper Towel Fold Types

Single-Fold

Single-fold towels are folded over once and are dispensed one at a time, similarly to facial tissues.

Recommended Size Single-Fold:
235mm(W) \pm 13mm with a fold depth of 140mm \pm 1.3mm.

Multi-Fold

Multi-fold towels have an extra fold which creates a 'Z' shape. These are dispensed one at a time – as you pull on a multi-fold towel, the product opens up.

Recommended Size Multi-Fold:
235mm(W) \pm 13mm with a fold depth of 67 or 80mm \pm 3mm.

C-Fold

C-fold towels have tabs that are folded in on each other to form a 'C' shape. When a C-fold towel is pulled from the dispenser, the product is still folded up.

Recommended Size C-Fold:
257mm(W) \pm 13mm with a fold depth of 102mm \pm 13mm.
